Adoption and Usage Assessment for Microsoft 365

2-WEEK ASSESSMENT

PulseOne helps organizations analyze how employees use Microsoft 365 to identify training gaps, improve productivity, and drive software adoption.

Deploying Microsoft 365 is only the first step; actual business value comes from employees using the tools effectively. If your team still relies on legacy file shares, external chat apps, or inefficient email habits, you are missing out on the productivity benefits of your investment.

> The PulseOne Microsoft 365 Adoption and Usage Assessment identifies exactly how your team works today and provides a targeted plan to improve adoption.

WHAT WE DO

We analyze usage telemetry across Teams, SharePoint, OneDrive, and Exchange to identify behavioral trends, shadow IT usage, and departments that need targeted training.
