# Backup and Recovery Readiness Assessment for Microsoft 365 1-WEEK ASSESSMENT

**PulseOne helps businesses evaluate their Microsoft 365 backup and recovery capabilities across Exchange Online, SharePoint, Teams, and OneDrive to ensure data is protected and recoverable.**

Microsoft 365 provides limited native data recovery capabilities. Accidental deletion, ransomware, and malicious insiders can result in permanent data loss if your organization does not have a dedicated backup and recovery strategy in place. Many businesses discover this gap only after a data loss event has already occurred.

> The PulseOne Microsoft 365 Backup and Recovery Readiness Assessment evaluates your current data protection setup across Exchange Online, SharePoint, Teams, and OneDrive, and provides a clear plan for implementing granular, reliable backup and recovery.

## WHAT WE DO

We review your current Microsoft 365 data retention policies, recycle bin and version history settings, and any existing third-party backup solutions. We assess your recovery time and recovery point objectives against your business requirements and identify critical gaps.

## WHO THIS IS FOR

- Small and mid-sized businesses running Microsoft 365
- Leaders who want a straight answer on where they stand

## KEY DELIVERABLES

- Review of native Microsoft 365 retention and recovery capabilities
- Assessment of current third-party backup solutions (if applicable)
- Recovery time objective (RTO) and recovery point objective (RPO) gap analysis

*Full deliverable list provided with your proposal.*

## WHAT IS NOT INCLUDED

- Deployment or configuration of backup solutions
- Data restoration or recovery services
- Implementation of retention policies or litigation holds
- PST migration or legacy email archival
- Compliance certification or regulatory audit support
- Licensing purchases or procurement

*Full exclusion list provided with your proposal.*

## ENGAGEMENT APPROACH

| Discover | Assess | Recommend | Handoff |
|---|---|---|---|
| Review business continuity requirements and current data protection setup. | Evaluate native Microsoft 365 recovery capabilities and existing backup solutions. | Design a comprehensive backup and recovery strategy. | Present the strategy and discuss backup implementation or managed data protection services. |

## BUSINESS VALUE

Ensure your critical business data is protected against accidental deletion, ransomware, and insider threats, and establish a recovery strategy that meets your business continuity and cyber insurance requirements.

## AT A GLANCE

| | |
|---|---|
| Duration | 1 Week |
| Price | $2,500-$4,200 |
| Solution areas | Cloud Security, Threat Protection |
