Endpoint Management Assessment for Microsoft Intune

2-WEEK ASSESSMENT

PulseOne helps organizations evaluate their readiness to transition to cloud-managed endpoints using Microsoft Intune, improving security and simplifying IT operations.

Managing devices across a hybrid or remote workforce using legacy, on-premises tools is inefficient and creates security blind spots. Transitioning to cloud-managed endpoints allows your IT team to secure, update, and deploy devices from anywhere.

> The PulseOne Microsoft Intune Endpoint Management Assessment evaluates your current device landscape and provides a roadmap for migrating to modern endpoint management.

WHAT WE DO

We review your current device inventory, management tools, and security policies. We then design a modern management architecture using Microsoft Intune and Windows Autopilot.

KEY DELIVERABLES

- Current device management review
- Microsoft Intune architecture design
- Windows Autopilot readiness assessment
- Endpoint security policy recommendations
- Migration roadmap and executive summary

WHO THIS IS FOR

- Small and mid-sized businesses running Microsoft 365
- Leaders who want a straight answer on where they stand

WHAT IS NOT INCLUDED

- Deployment or configuration of Microsoft Intune
- Device enrollment or migration
- Windows Autopilot setup or provisioning
- Custom compliance policy development or implementation
- Licensing purchases or procurement
- Ongoing endpoint management or managed services
- Support for non-Microsoft mobile device management (MDM) platforms
- Custom scripting or automation development

ENGAGEMENT APPROACH

Discover	Assess	Recommend	Handoff
Review current device inventory and management processes.	Evaluate readiness for Microsoft Intune and Windows Autopilot.	Design the target architecture and migration strategy.	Present the roadmap and discuss implementation or managed endpoint services.

BUSINESS VALUE

This assessment provides a clear path to zero-touch deployment, automated patching, and consistent security policies across all company-owned and bring-your-own-device (BYOD) endpoints.

AT A GLANCE

Duration	2 Weeks
Price	$3,500-$6,000
Solution areas	Cloud Security, Threat Protection
