Security Baseline Assessment for Microsoft 365

2-WEEK ASSESSMENT

PulseOne helps 50-500 seat businesses assess their Microsoft 365 security setup so they can identify gaps, reduce risk, and protect their data.

Many small and mid-sized businesses pay for advanced Microsoft 365 security features but never fully deploy them. Without a clear view of your configuration, you may be exposed to unnecessary risks from compromised identities, unmanaged devices, or unsecured data.

> The PulseOne Microsoft 365 Security Baseline Assessment provides a clear, practical review of your current Microsoft 365 security setup. We help you understand what you own, how it is configured, and where your critical gaps are.

WHAT WE DO

PulseOne will take a thorough look at your Microsoft 365 environment, focusing on identity and access management, device compliance, and data protection. We map your current configuration against Microsoft's recommended security controls to identify vulnerabilities.

KEY DELIVERABLES

- Current-state security configuration review
- Identification of unused security licensing
- Prioritized risk and gap summary
- Executive presentation of findings
- Actionable roadmap for fixes

WHO THIS IS FOR

- Small and mid-sized businesses running Microsoft 365
- Teams that need to assess their Microsoft 365 security setup
- Leaders who want to identify gaps, reduce risk, and protect their data

WHAT IS NOT INCLUDED

- Implementation or configuration of any security controls or policies
- Fixes of identified vulnerabilities
- Architecture design or solution planning
- Deep forensic analysis or log review
- Compliance certification or audit preparation
- Licensing purchases or procurement
- Ongoing monitoring or managed security services

Full exclusion list provided with your proposal.

ENGAGEMENT APPROACH

Discover	Assess	Recommend	Handoff
Review current Microsoft 365 licensing and security goals.	Analyze current configurations across Entra ID, Defender, and Microsoft 365.	Build a prioritized roadmap for security improvements.	Present findings and discuss next steps for implementation or managed support.

BUSINESS VALUE

This assessment helps you reduce risk, get more out of the Microsoft 365 investment, and build a clear path toward a more secure, mature IT environment.

AT A GLANCE

Duration	2 Weeks
Price	$3,500-$6,000
Solution areas	Cloud Security, Threat Protection
