Vulnerability Management Assessment for Microsoft Defender 2-WEEK ASSESSMENT

PulseOne helps 50-500 seat businesses identify, prioritize, and plan fixes for vulnerabilities across their Microsoft 365 and endpoint environment using Microsoft Defender Vulnerability Management.

Vulnerabilities in software, operating systems, and configurations are one of the most common entry points for cyberattacks. Many small and mid-sized businesses lack a systematic process for identifying and prioritizing vulnerabilities across their environment - leaving known weaknesses unaddressed for months or years. Microsoft Defender Vulnerability Management, included in Microsoft Defender for Endpoint, provides continuous asset discovery, vulnerability assessment, and prioritized fixes guidance across your endpoints and Microsoft 365 environment.

> The PulseOne Microsoft Defender Vulnerability Management Assessment helps you understand your current exposure, establish a baseline, and build a practical fixes plan.

WHAT WE DO

We deploy and configure Microsoft Defender Vulnerability Management in your environment, conduct a structured vulnerability assessment across your endpoints and Microsoft 365 configuration, and deliver a prioritized fixes roadmap ranked by risk, exploitability, and business impact.

WHO THIS IS FOR

- Small and mid-sized businesses running Microsoft 365
- Leaders who want a straight answer on where they stand

KEY DELIVERABLES

- Deployment and configuration of Microsoft Defender Vulnerability Management (read-only assessment mode)
- Full asset inventory and software discovery across managed endpoints

Full deliverable list provided with your proposal.

WHAT IS NOT INCLUDED

- Fixes of identified vulnerabilities
- Patch deployment or software updates
- Penetration testing or active exploitation of vulnerabilities
- Deep forensic analysis or incident response

Full exclusion list provided with your proposal.

ENGAGEMENT APPROACH

Discover	Assess	Recommend	Handoff
Review current endpoint inventory, patch management processes, and security requirements.	Deploy Microsoft Defender Vulnerability Management and conduct a full vulnerability scan	Analyze results and build a prioritized fixes roadmap ranked by risk and business impact.	Present findings and discuss fixes support or ongoing vulnerability management services.

BUSINESS VALUE

Gain a clear, prioritized view of your vulnerability exposure and walk away with a practical fixes plan that reduces your attack surface and supports cyber insurance and compliance requirements.

AT A GLANCE

Duration	2 Weeks
Price	$3,500-$6,000
Solution areas	Threat Protection, Cloud Security

Request an assessment.
