Email Security Assessment for Microsoft 365

1-WEEK ASSESSMENT

PulseOne helps SMBs evaluate their Microsoft 365 email security configuration to protect against phishing, impersonation, account takeover, and advanced email threats.

Email remains the most common entry point for cyberattacks. Phishing, business email compromise, and account takeover attacks continue to target small and mid-sized businesses, and many organizations rely on default Microsoft 365 email settings that fall well short of best-practice protection.

> The PulseOne Microsoft 365 Email Security Assessment provides a focused review of your current email security configuration, identifying gaps and providing a clear fixes plan to protect your users and your data.

WHAT WE DO

We review your Microsoft 365 email environment against Microsoft's recommended security baseline, focusing on anti-phishing policies, anti-spoofing controls, email authentication records, and Defender for Office 365 configuration.

WHO THIS IS FOR

- Small and mid-sized businesses running Microsoft 365
- Leaders who want a straight answer on where they stand

KEY DELIVERABLES

- Review of current anti-phishing and anti-spoofing policies
- Email authentication analysis (SPF, DKIM, DMARC)
- Defender for Office 365 configuration review
- Safe Links and Safe Attachments policy assessment
- Prioritized fixes roadmap
- Executive presentation

WHAT IS NOT INCLUDED

- Implementation or configuration of email security policies
- Deployment of Defender for Office 365 or email encryption
- Configuration of SPF, DKIM, or DMARC DNS records
- Email migration or archival services
- Deep email log analysis or forensic investigation
- Compliance certification or regulatory audit support
- Licensing purchases or procurement
- Ongoing email security monitoring or managed services

ENGAGEMENT APPROACH

Discover	Assess	Recommend	Handoff
Review current email security configuration and business requirements.	Analyze email authentication, anti-phishing policies, and Defender for Office 365 settings.	Build a prioritized roadmap for email security hardening.	Present findings and discuss implementation or managed email security services.

BUSINESS VALUE

Reduce the risk of phishing attacks, business email compromise, and account takeover by ensuring your Microsoft 365 email environment is configured to Microsoft's recommended security standards.

AT A GLANCE

Duration	1 Week
Price	$2,500-$4,200
Solution areas	Threat Protection, Cloud Security
