MICROSOFT MARKETPLACE
CONSULTING SERVICE OFFER

Managed Administration Service for Microsoft 365

PulseOne provides ongoing Microsoft 365 administration and support for 50-500 seat businesses, including patching, security monitoring, user lifecycle management, and proactive response to Microsoft security advisories.

Managing a Microsoft 365 environment is not a one-time project. As Microsoft continuously updates its platform, releases new security advisories, and expands its feature set, businesses need a dedicated partner to keep their environment secure, current, and running at peak performance. Many small and mid-sized businesses lack the internal IT resources to stay ahead of Microsoft's release cadence, respond to emerging threats, or manage the day-to-day administration of their Microsoft 365 tenant. The result is an environment that drifts out of compliance, accumulates technical debt, and exposes the business to unnecessary risk.

> The PulseOne Microsoft 365 Managed Administration Service provides ongoing, proactive management of your Microsoft 365 environment by a dedicated team of Microsoft-certified professionals.

WHAT WE DO

PulseOne provides continuous administration and support across your Microsoft 365 environment, including proactive security management, user lifecycle support, and application performance monitoring.
