App Protection Policy Assessment for Microsoft Intune

1-WEEK ASSESSMENT

PulseOne helps 50-500 seat businesses protect corporate data on personal iOS and Android devices using Microsoft Intune App Protection Policies - without requiring device enrollment.

Most businesses have employees who use personal smartphones and tablets to access corporate email, Teams, and files. Requiring those employees to enroll their personal devices into a mobile device management (MDM) system is often met with resistance - and for good reason. Employees reasonably expect to keep their personal device personal. Microsoft Intune App Protection Policies (APP) solve this problem. They allow your organization to protect corporate data inside Microsoft apps - Outlook, Teams, OneDrive, SharePoint - without touching, enrolling, or managing the personal device itself. Your employees keep full control of their device. You keep full control of your corporate data.

> The PulseOne Microsoft Intune App Protection Assessment evaluates your current mobile access environment and designs a tailored App Protection Policy framework that secures corporate data on personal iOS and Android devices without the friction of full device enrollment.

WHAT WE DO

We review how your employees currently access corporate data on mobile devices, assess your existing Intune and Entra ID configuration, and design a set of App Protection Policies that enforce your data security requirements without requiring MDM enrollment.

WHO THIS IS FOR

- Small and mid-sized businesses running Microsoft 365
- Leaders who want a straight answer on where they stand

KEY DELIVERABLES

- Review of current mobile access patterns and personal device usage
- Entra ID and Intune licensing and configuration assessment

Full deliverable list provided with your proposal.

WHAT IS NOT INCLUDED

- Deployment or configuration of App Protection Policies
- Full Intune MDM enrollment or device management
- Windows device management or Windows Autopilot

Full exclusion list provided with your proposal.

ENGAGEMENT APPROACH

Discover	Assess	Recommend	Handoff
Review current mobile access patterns, device types, and corporate data exposure.	Evaluate existing Intune, Entra ID, and Microsoft 365 configuration for APP readiness.	Design a tailored App Protection Policy framework aligned to your security requirements and user	Present the policy design and rollout plan, and discuss implementation or managed

BUSINESS VALUE

Protect your corporate data on personal devices without the resistance and complexity of full MDM enrollment. App Protection Policies are Microsoft's recommended approach for BYOD environments - and the most practical path to mobile data security for most small and mid-sized businesses.

AT A GLANCE
